

Environmental friendly heavy metal precipitation agents

green and sustainable

Product	Properties	Application	Delivery form
HydroMet Alpha®-SL	<ul style="list-style-type: none"> • exceptional ecotox profil • usable for all metals • easy to use, safe to handle • odorless 	<ul style="list-style-type: none"> • compliance of metal threshold values even in presence of complexing agents • for all industrial waste water streams • no turbidity in surfactant based waste water 	<ul style="list-style-type: none"> • can with 25 kg net • drum with 200 kg net • IBC container with 1000 kg net
HydroMet Alpha®-ME/X4	<ul style="list-style-type: none"> • exceptional ecotox profil • usable for all metals • especially for high zinc values • odorless 	<ul style="list-style-type: none"> • compliance of metal threshold values even in presence of complexing agents • for all industrial waste water streams • no turbidity in surfactant based waste water 	<ul style="list-style-type: none"> • can with 25 kg net • drum with 200 kg net • IBC container with 1100 kg net
HydroMet Alpha®-ME/X7	<ul style="list-style-type: none"> • exceptional ecotox profil • usable for all metals • easy to use, safe to handle • odorless 	<ul style="list-style-type: none"> • compliance of metal threshold values even in presence of complexing agents • for all industrial waste water streams • no turbidity in surfactant based waste water 	<ul style="list-style-type: none"> • can with 25 kg net • drum with 200 kg net • IBC container with 1000 kg net
Diplexin AM-550	<ul style="list-style-type: none"> • exceptional ecotox profil • especially for Zn, Cu, Hg, Ag • economy-priced • odorless 	<ul style="list-style-type: none"> • compliance of metal threshold values even in presence of complexing agents • for all industrial waste water streams 	<ul style="list-style-type: none"> • can with 25 kg net • drum with 200 kg net • IBC container with 1000 kg net
Diplexin MR-4	<ul style="list-style-type: none"> • sulfide-free • exceptional ecotox profil • especially for Cu, Au, Ag, Rh • odorless 	<ul style="list-style-type: none"> • compliance of metal threshold values even in presence of complexing agents • for all industrial waste water streams • no turbidity in surfactant based waste water 	<ul style="list-style-type: none"> • can with 30 kg net • drum with 300 kg net • IBC container with 1000 kg net
