

Separation- and flocculating agents

clearance of colloidal turbidity

Product	Property	Application	Delivery form
ZetaPol 8811-HP	<ul style="list-style-type: none"> • high performance product • strong flocculation • achieves clear water phase • perfect sludge filtration • especially for resist wastewater 	<ul style="list-style-type: none"> • clearance of turbidity • for emulsion splitting • improves flakes • achieves brilliant water phase 	<ul style="list-style-type: none"> • Bags with 15 kg net • Pallet with 540 kg net • BigBags with 400 kg net
ZetaPol 8812-SP	<ul style="list-style-type: none"> • high performance product • strong flocculation • achieves clear water phase • perfect sludge filtration • especially by cleaners 	<ul style="list-style-type: none"> • clearance of turbidity • for emulsion splitting • improves flakes • achieves brilliant water phase • multi purpose application 	<ul style="list-style-type: none"> • Bags with 15 kg net • Pallet with 540 kg net • BigBags with 400 kg net
ZetaPol 8821-FF/BL	<ul style="list-style-type: none"> • high performance product • achieves clear water phase • perfect sludge dewatering • high organic adsorption • optimal for water circulation / recycling 	<ul style="list-style-type: none"> • clearance of turbidity • for emulsion splitting • improves flakes • achieves brilliant water phase 	<ul style="list-style-type: none"> • Bags with 15 kg net • Pallet with 540 kg net • BigBags with 400 kg net
ZetaPol 8813-N	<ul style="list-style-type: none"> • Special products for dispersion glues • strong flocculation • high splitting- and flocculation properties • multi purpose application 	<ul style="list-style-type: none"> • clearance of turbidity • for emulsion/dispersion splitting • improves flakes • achieves brilliant water phase 	<ul style="list-style-type: none"> • Bags with 15 kg net • Pallet with 540 kg net • BigBags with 400 kg net
