

Separation- and flocculating agents

Reaction release agent with heavy metal precipitation properties

Product	Properties	Application	Delivery form
ZetaPol 1100-MEX	<ul style="list-style-type: none"> • good flocculation • achieves clear water phase • perfect sludge dewatering • high filtration property • for highly concentrated waste water 	<ul style="list-style-type: none"> • precipitation of metals • perfect for Ni, Cu, Zn • multi purpose use • stable flocculation 	<ul style="list-style-type: none"> • Bags with 10 kg net • Pallet with 600 kg net • BigBags with 800 kg net
ZetaPol 1101-NPM	<ul style="list-style-type: none"> • good flocculation • achieves clear water phase • perfect sludge dewatering • high filtration property • for highly concentrated waste water 	<ul style="list-style-type: none"> • clearing of dispersions • clearing of emulsions • precipitation of metals • perfect for Cu, Zn, Ni, Sn • very good flocculation 	<ul style="list-style-type: none"> • Bags with 10 kg net • Pallet with 600 kg net • BigBags with 800 kg net
Permatron 13-BF/NPM	<ul style="list-style-type: none"> • good flocculation • achieves clear water phase • perfect sludge dewatering • high filtration property • for highly concentrated waste water 	<ul style="list-style-type: none"> • precipitation of metals • perfect for Zn, Cu, Ag, Hg, (Ni) • multi purpose use • stable flocculation 	<ul style="list-style-type: none"> • Bags with 10 kg net • Pallet with 600 kg net • BigBags with 800 kg net
Permatron 13-BA/E	<ul style="list-style-type: none"> • good flocculation • achieves clear water phase • perfect sludge dewatering • high filtration property • for highly concentrated waste water 	<ul style="list-style-type: none"> • precipitation of metals • perfect for Ni, Zn, Cu • multi purpose use • stable flocculation 	<ul style="list-style-type: none"> • Bags with 10 kg net • Pallet with 600 kg net • BigBags with 800 kg net
